

At NSW Spine Specialists, Dr Brian Hsu and Dr Bisham Singh care for Orthopaedic spinal conditions in both adults and children.

We have clinics at Norwest, Chatswood, Liverpool, Campbelltown, Penrith, Macquarie University Hospital, Sydney Olympic Park, Bowral and Taree.

Our Doctors perform surgery at:

- North Shore Private Hospital
- Norwest Private Hospital
- Westmead Private Hospital
- Macquarie University Hospital
- Westmead Children's Hospital

OUR NEW NORWEST ROOMS

NEW NORWEST ADDRESS

Our Norwest rooms have a new address (right next door) Suite 205, 10 Century Circuit, Norwest NSW 2153. The new rooms provide a bigger waiting area with tea and coffee facilities for patients, a designated patient education room and fellowship office for our trainee doctors.

SYDNEY OLYMPIC PARK

Dr Hsu is now consulting at Sydney Olympic Park again, at Sydney Sports Medicine, 6 Figtree Drive, Sydney Olympic Park. The rooms are easily accessed by public transport and have lots of street and station parking available.

MONTHLY BOWRAL CLINIC

Dr Singh has commenced a clinic in Bowral. Initially a monthly clinic, it will complement the clinic in Campbelltown and be of service to the southern Highlands, including Mittagong, Wollongong & Nowra. Bowral is such a lovely part of NSW and we are excited to be visiting each month. Please see the link to the Bowral rooms.

CERVICAL SPINE RESEARCH SOCIETY (CSRS)

Dr Singh attended the 47th annual meeting of the Cervical Spine Research Society (CSRS) and instructional course held in New York in November 2019. CSRS is a recognised authority on diseases of the cervical spine. It is a multidisciplinary organisation that provides a forum for the exchange of ideas and promotes research of cervical spine injury and disease. The concept of a sub-specialty group devoted to the cervical spine was first considered in 1966. A preliminary meeting to consider the formation of such an organization was held in Las Vegas, Nevada in February 1973 during the annual meeting of the American Academy of Orthopedic Surgeons.

VISIONTREE OPTIMAL CARE (VTOC)

We have recently launched a new program, VisionTree Optimal Care (VTOC), which is a secure online patient portal that gives you access to patient forms and patient education material.

Initially, our goal with launching VTOC is to provide a more efficient and simpler way of completing forms prior to your consultation, either online or using our ipad in the rooms. Upon initial registration with our practice, you will receive a VTOC login to your patient portal.

We are currently using the electronic version of the patient registration form for our new patients to complete. We also plan on using VTOC to directly check-in with our surgical post-op patients and provide additional information related to post-op progress.

MY FELLOWSHIP EXPERIENCE WITH DR HSU (in Complex Spinal Deformity)

“After waiting for nearly a year for the completion of my medical registration in Australia, I finally arrived at Sydney on 28 June 2019. It marked the beginning of an exciting 6 months fellowship experience with Dr Brian Hsu, a renowned spine surgeon in Australia.

I was fortunate to be able to take part in various spinal deformity correction surgeries with Dr Hsu (average 400 cases per year). The hands-on experience helped tremendously in improving my technique and confidence in spinal instrumentation.

I had the privilege of discussing cases regularly with my mentor, learning the indications of surgery. Also calculating the type and magnitude of deformity, planning the surgical strategies and honing techniques to correct the deformity.

GP EDUCATION

NSW Spine Specialists will be holding an Educational Day on 30/5/20.

As you may know GPs must accrue Quality Improvement and Continuing Professional Development (QI&CPD) to maintain and improve their professional knowledge and skills.

PLEASE EMAIL

**sally@nswspinespecialists.com.au
IF YOU'RE INTERESTED IN ATTENDING**

Although I was away from home (Singapore) for 6 months, I was glad that I was warmly received by not just Dr Hsu, but his team of surgeons, anaesthetists, nurses and administrative staff. It was a great experience for me, and I would recommend this fellowship to any young surgeon who wishes to sub-specialise in spinal deformity surgery”

Best regards,

Dr Ji Min
